Update 01.01.2010

Highland Fold (SFL)

Body

The medium to large sized cat is muscular and stocky. Chest, shoulders and back are broad and massive.
The legs are short and muscular, the paws are thick and round.
The tail is of medium length, reaching at least to the shoulders. It ends in a rounded tip. It should not have thickened areas or stiffness and should be fully flexible up to the tip.
The neck is short and solid.

Head

The head is rounded, massive, broad with a firm chin. The nose is short, broad and straight.
The profile is curved (without a stop). The cheeks are full and round.
The large, round whisker pads give definition to the short, pronounced muzzle.

Ears

The ears are small and forward folded, with slightly rounded tips, which point towards the centre of the head. They are set wide apart and lie flat to the skull.

Eyes

The eyes are large and round. They are wide set.
Eye colour corresponds with the coat colour.

Coat

The coat is of medium length and very dense, with substantial undercoat. It is crisp and does not lie flat.

Colour varieties

All colours, patterns with any amount of white and pointed colours with Siamese points without white are recognized. The description of colours is listed in the general list of colours.

Faults

- Inflexibility of any part of the tail is a severe fault.
- Ears not lying flat to the skull
- Profile with a stop

Scale of points

Body	10 points
Tail	15 points
